44 g per piece  
2.9 x 1.9 x 0.8 in; 1.1 oz

2 in each package

Available with or without  
lanyard

Use case and application  
dependent

### Pitching the Reel

- The Reel is another versatile lightweight wearable scanning option that can be worn on a lanyard or a tiltable clip.
- The Reel is our alternative to wearing MARK as a back of hand scanner and instead enabling customers with another flexible wearable scanning option.
- Scanners can be triggered by a trigger button on the back of the Reel.
- It's a great fit for use cases with: a low scan volume, special glove requirements, and for handling sensitive assets

### Use Case Examples

- ① Handling sensitive items and assets, i.e. healthcare and lab environments
- ② Less than 600 scans / shift, i.e. somebody stepping into a scanning process for a short period of time

#### Lanyard

#### Tiltable clip
